- You do NOT need to follow this plan exactly. This is only a *SUGGESTED* plan.
- This example assumes that the student comes in with NO additional credit from High School but assumes the completion of High School foreign language. Of course, AP credit; Transfer Credit; Dual Enrollment Credit; or Advanced Standing would affect this plan.
- Students have the option to take courses during the summer at VT or as approved transfer credit from a community college with a grade of C or better.
- The field experience credits (internship, research, study abroad, or service learning) may or may NOT fall during the hours of the actual experience.
- See adviser for selection recommendations for the CLE areas.

Free Electives are classes that do not count toward your CLE or major but are applied toward the credit hours needed to reach the 120 hours required to graduate. Free Electives can be whatever you wish. They may include: AP or IB credit, transfer credit, credit required from a former major, study abroad credit, etc. Many students will replace free electives with double major or minor credits.
